

General Energy. M.M. Kulyk, V.P. Gorbulin, O.V. Kyrylenko **"Conceptual approaches to the energy development in Ukraine" (analytical materials).** / Kyiv, Institute of General Energy of the NAS of Ukraine. 2017. – 78 p. Circulation – 300 copies.

ISBN 978-966-02-8281-0

The presented analytical materials contain the results of studies on the evaluation of macroeconomic indicators of the Ukrainian economy development on the basis of which the demand forecasts for the main types of energy resources have been developed. The obtained results were used to study the state and development of the directions and state of the art of certain sectors of the energy industry for the period up to 2040. Also, the environmental problems and energy security issues were identified, as well as the volumes, sources and mechanisms of the necessary investment in the energy sector of the country were determined.

The publication is intended for decision makers on the issues of further development of the energy sector, as well as scientific and engineering employees and managers working in the fuel and energy sector. It can be useful for teachers and students of higher education institutions.
